

# Max everest

**An Easy-to-Use  
Enterprise Infrastructure Management System**

**MAX Everest – Netflow**

## MAX Everest – Netflow

MAX Everest offers an integrated Network, System, and Applications monitoring solution that provides end-to-end advanced monitoring and managing capabilities to heterogeneous and often complex IT environments. MAX Everest' Netflow module leverages Cisco's NetFlow technology and analyzes the network traffic, helping the network managers understand the bandwidth usage in the monitored network.

### Key Features

- **Simplified Traffic Management:** MAX Everest's Netflow module allows you to configure and get traffic analysis about network devices, network segments, protocols, and applications.
- **Network Segment Traffic Analysis:** You can monitor all traffic from the various interfaces of the router.
- **Network Device Traffic Analysis:** You can monitor all traffic for any network device.
- **Protocol Traffic Analysis:** You can monitor all traffic for any protocol
- **Application Traffic Analysis:** You can monitor all traffic for any application.
- **Comprehensive Reports:** MAX Everest provides informative reports about the network traffic, which will be helpful for trend analysis and capacity planning.

### Key Benefits

- **Trend Analysis and Capacity Planning:** Using the Netflow data, you can find the bandwidth utilization trend. Based on the utilization data, you can chart out your capacity planning.
- **High Availability and Performance of the IT Infrastructure:** MAX Everest's Netflow module enables you to identify the bottlenecks in the network and to troubleshoot them before they affect the performance of your network.
- **High-level Traffic Analysis:** Using the informative reports, you can know the bandwidth traffic trends and peak usages.

### About Equator One

Equator One is a leading provider of IT infrastructure management solutions and mobile infrastructure that increase and optimize the performance and availability of mission-critical computing infrastructure.

Our comprehensive suite of solutions is designed to address the fault and performance requirements enterprises and new-generation service providers have. They proactively measure and manage the crucial infrastructure resources, and provide visibility and flexible mechanism for optimizing the business operation.

Based on an open, distributed and scalable architecture, our solutions provide a whole host of business, service level, applications and systems and network management capabilities.

Aside from optimizing your organization's IT infrastructure performance and availability in the Enterprise environment, Equator One's solutions deliver a high return on investments (ROI), and lower the total cost of ownership to our service provider customers, while allowing you to achieve maximum profitability. This is imperative in today's business context, where IT investments are tightly bound to business goals, and have to yield high business benefits to organizations.

Headquartered in Singapore, we have representatives in China, Hong Kong, Korea, India, Indonesia, Malaysia, Taiwan, US. Together with our partners, we deliver our innovative, best-in-class technologies to you around-the-clock.
